PROJECTS

Project Management

ERP System (MERN Stack): Managed a MERN stack ERP platform with integrated HRM and CRM modules to streamline HR operations, sales management, and business workflows.

AI Health & Fitness App (Agentic AI): Managed an Agentic AI-powered mobile application delivering personalized health, fitness, nutrition, and wellness recommendations.

Massage Booking Platform (MERN Stack): Successfully delivered a MERN stack booking platform for massage therapists with custom admin and staff portals, Stripe payment integration, refunds, and appointment rescheduling.

Property Management SaaS (MERN Stack): Managed a MERN stack SaaS property management platform featuring predictive maintenance analytics, tenant management, amenity bookings, and subscription billing.

CMS & E-commerce Solutions: Managed multiple CMS-based websites and e-commerce stores with customizable content management and online selling capabilities.

Personal Projects

TravelGenie (Agentic AI | MERN): Built an Agentic AI-powered travel planning platform with automated itinerary generation, flight and hotel bookings, personalized recommendations, and AI-curated travel content aggregation.

Inventory Management Robot: Built a computer vision-powered autonomous inventory management robot for retail stores, automating stock monitoring and reducing manual intervention.

Python Security Testing Tool: Developed a Python-based reverse engineering and penetration testing tool for identifying vulnerabilities in web applications.

FoodHub (MERN SaaS): Engineered a MERN stack restaurant management system featuring automated restaurant operations, CMS-powered restaurant websites, QR ordering, POS integration, and centralized business management.

MotoPulse (Next.js | Payload CMS): Developed a Next.js and Payload CMS-powered social platform for motorcycle enthusiasts to share rides, connect with fellow riders, and discover touring experiences.

Investigation Labs: Created an interactive gaming platform featuring subscription boxes, leaderboards, community engagement, result submissions, and an integrated online store.

Custom MERN Websites: Delivered scalable MERN stack websites and e-commerce platforms tailored to diverse business requirements.

FYP Mentorship

SessionHub: Guided a University group through development of a MERN stack online learning platform featuring virtual classrooms, AI-powered question paper generation, quizzes, assignment management, and integrated video conferencing.

AI Lawyer worked on an AI-powered legal assistant with university FYP Group, capable of performing legal research, preparing legal documentation, and assisting users in filing cases based on specific scenarios.

Smart Riding Helmet: Mentored a group in designing and engineering of an IoT-enabled smart riding helmet equipped with GPS, GSM, and automatic accident detection for real-time emergency alerts and enhanced rider safety.

AI Resume Maker: Agentic AI Based resume maker which identifies job description and tailor your **ATS Friendly** resume accordingly.
